

Unraveling ICD-10-PCS

This presentation will focus on the code format and structures of the ICD-10-PCS.

Advanced coding: Hands on coding workshop for Inpatient Cases

Attending coding roundtables is an exciting way for coders and clinical documentation specialists to keep up-to-date on coding education, improve your coding skills and participate in hands-on practice. Bring your own challenging coding scenarios and issues for discussion with the group.

In addition, advanced coding cases with answers will be provided for further practice and discussion. This is a "working" meeting so coders and CCDS/CDIPs should come to the roundtable prepared to code and participate in discussion regarding the coding cases.

Don't forget to bring your ICD-10-CM and ICD-10-PCS manuals.

Date: Wednesday June 14, 2017

Time: 12:30-5:00 pm. (Registration begins at 12:30pm)
